

Hatch Medical to Broker Innovative Male Urinary Incontinence Device

Hatch Medical, L.L.C., a medical device incubator and technology brokerage firm, announced today that it has entered into an agreement with MUCOM L.L.C. to broker the sale or license of its patented male urinary incontinence device MUI Comfort™

MUI Comfort™ is an integrated external collection system that meets the needs of a growing demographic that is coping with the consequences of stress, urge, and overflow incontinence. This innovative technology is differentiated from competing products by providing a complete solution that addresses both functional and psychological aspects associated with male urinary incontinence. MUI Comfort™ has several elements that are central to its patented design including:

- A lightweight collection bag with an integrated drainage neck and secured opening.
- A soft inner liner to protect the skin from perspiration and potential allergenic reaction.
- An enlarged opening with an adjustable closure mechanism that is part of three key elements that prevent accidental leaks, protect the skin, and provide secure fixation.
- A wicking component that draws urine into a superabsorbent-deodorizing polymer and will bond with any liquid to minimize odor, prevent sloshing and leakage.

“We are excited to be working with the MUCOM team and representing such an innovative technology that has the potential to provide millions of men with a superior management option for their stress, urge, and overflow incontinence,” commented Paul Gianneschi, Managing Principal at Hatch Medical L.L.C.

Donna Lou DuPree McCormack, RN, BSN, President of MUCOM, LLC commented, “We are excited to offer this innovative technology to countless men who are subjected to the embarrassment and social isolation of urinary incontinence, who have been underserved by disappointing products. Our patented technology has the potential to enhance the wellness and quality of life for untold millions of males as they eliminate the use of diapers and pads. We are delighted to be working with Hatch Medical to bring this new technology to the market.”

Founded in 2000, Hatch Medical is an incubator and broker of medical device technologies, assisting clients with development, licensing, distribution and asset sales.
