

Hatch Medical Expands Presence in Israeli Medical Device Market

Duluth, Georgia - Hatch Medical, L.L.C., a medical device incubator and technology brokerage firm, announced today expansion of its activities in the Israeli medical device industry. In an effort to offer its unique incubator model to Israeli medical device entrepreneurs and its brokerage services to established companies, Hatch Medical has partnered with Aaron Feldman, an Israel-based medical device executive.

Paul Gianneschi, Managing Principal at Hatch Medical commented, "Israel is recognized as a leader in life science innovation and we are excited to be working with Aaron in identifying cutting-edge medical device technologies for commercialization. Having a local presence in the Israeli market is expected to provide us with access to promising early-stage technologies and will allow us to effectively source innovative technologies and devices for our U.S. and European clients."

According to Feldman, the response to Hatch Medical among Israeli companies has been enthusiastic. "Being itself a nimble, entrepreneurial-minded firm, Hatch Medical is uniquely in tune with the mindset and particular needs of the typical Israeli R&D company", stated Feldman. The collaboration has already resulted in a consulting project, with discussions currently underway with a number of companies for business development projects.
